Chatbot using HTML, CSS, Javascript

Built a responsive chatbot for the college website using HTML, CSS, and JavaScript, designed to function across multiple devices. It includes an interactive UI with real-time text-based and voice responses, improving user engagement and accessibility.

Cooking Assistant App using Flutter

Developed a recipe application featuring a diverse range of cuisines, providing users with an organized collection of dishes. It includes a structured, step-by-step guide for each recipe, allowing users to follow precise cooking instructions from start to finish.
